

IN THE SPECIFICATION

Please amend paragraph 37 as follows.

Web server 64 is connected to an MS SQL server transactional database 66 through COM server components 68. In addition, web ~~server 62~~server 64 is connected to a data warehouse 70 through COM server components 68 and business objects 72.

Please amend paragraph 50 as follows.

Figure 12 is an exemplary embodiment of a screen shot 320 which is a continuation of Customer List user interface 300. Screen shot 320 includes additional filters such as a Business Team Code - Product Segment - Product Segment Code pull-down list 322, a Plant Name-Code pull-down list 324, and a Product Family-Code pull-down list 326. Selection of additional filters allows dashboards to be narrowed with respect to scope. However, selection of additional filters is not required. Screen shot 320 also includes a back button 328, a standard navigation Next button 330, and an Update button 332. Use of ~~a standard~~standard navigation Next ~~button 328~~button 330 finalizes the parameter selection. Use of ~~an Update button 330~~Update button 332 facilitates saving intermediate selections. ~~A Back button 332~~Back button 328 facilitates modifications of previously displayed pull-down lists.
